

Deliverable D8.1 Summary

Dissemination and use of knowledge generated in the project is governed by the terms of the Grant Agreement and the terms of the Consortium Agreement. This document summarizes the key aspects that refer to the IPR terms and where necessary provides direct links to the aforementioned documents. In order to make sure that these terms are followed, to avoid disputes and to facilitate business planning, the Consortium Partners will keep track of all items of knowledge relating to the work of the project (both Background and Results developed in the project) in specific documents that will be regularly (or on a need basis) updated and distributed to all partners. More details regarding this aspect are presented in the next sections.
